The members of the Tennessee Association of the FFA constitute a state association in the national organization of Future Farmers of America. This organization is made up of students enrolled in Agricultural Education in the public high schools. Students studying Agricultural Education are enrolled in supervised work experiences designed to increase in scope from year to year. FFA chapters are located in every state in the Union. The annual FFA Convention is to be held in Indianapolis, IN.

Important Notice

The Fair will open to the public at 3:00 p.m. Friday, September 9th, and will close at midnight, Sunday, September 18th. In order to open at noon Friday, we must have as many exhibits as possible in place by this time. We are, however, aware of the fact that this would work a hardship on FFA exhibitors because of school responsibilities, and we are therefore permitting entries to be delivered Thursday, September 8th until 7:00 p.m., or Saturday, September 10th from 7:00 a.m. to 10:00 a.m. **The exhibits arriving on Saturday morning should be entered through the Hill Top Gate. Please note these hours of delivery because we cannot allow delivery during hours when the fair is open to the public.**

Special Rules

1. Competition in this department is open to any FFA member in the State, provided he/she is a bona fide student of Agricultural Education, except that competition in Special Classes 12-14 is open only to East Tennessee FFA Chapters.
2. No entry fee will be charged.
3. Entries should be made on Exhibitor Entry Form on page 87 or by visiting the website: www.tnvalleyfair.org. Online entries will be accepted beginning Friday July 1 and will continue through Friday, August 26th. **Please pre-register as many exhibits as possible to speed check-in process.** Entries can be registered by superintendent at check-in.
4. All exhibits should be in place before 10:00 a.m., Saturday, September 10th, for judging to begin at 11:00 a.m.
5. An individual may enter only one exhibit in any lot.
6. Teachers should see that each exhibit sent in has on it a label giving the name and address of the exhibitor and also the name of the variety, or the class and lot under which it is desired to make entry.
7. Teachers of Agricultural Education must certify that exhibits are produced in students' own supervised occupational experience program or by students enrolled in Agricultural Education for the first time and that crop exhibits are of current year's growth except burley leaf tobacco. Class 6 may be either current or previous year's crop.
8. In all production exhibits, the Fair reserves the right to check any entry in the field at maturity, if conditions seem to warrant same, and hold premium money until such production is verified.
9. All exhibits including ribbons may be removed Sunday, September 18th, from 8:00 a.m. - 10:30 a.m. or after 10:00 p.m. **Any exhibits removed prior to this date and time will forfeit all premiums.**
10. All exhibits not removed by 6:00 p.m., Monday, September 19th, will be disposed of by those in charge of the department.

THE MIKE MILBURN MEMORIAL SCHOLARSHIP

This is a \$300.00 Freshman Scholarship to the University of Tennessee College of Agriculture. This scholarship to be given annually to an FFA member from East Tennessee who has been admitted to the University of Tennessee for Fall Semester of the current year. Final selection of the recipient of this award to be made by the Scholarship Committee of the University of Tennessee. Application for this award should be secured from teachers of Agricultural Education. Application should be completed and returned to the Ag-Ed Teacher. To be considered for this award, applications must be submitted to the college of Agricultural Sciences and Natural Resources of the University of Tennessee by February 1, of each year.

FFA Corn Show

Class 1—Field Corn Production Exhibit

Score Card

Soundness of grain _____ 10 points
 Yield per acre _____ 90 points

Premiums for Class 1

1st	2nd	3rd-5th	6th-8th	9th-10th
\$15.00	\$12.50	\$10.00	\$7.50	\$6.00
\$5.00 for the next twenty creditable entries				

Lot 1

- Corn must be a dent hybrid or open-pollinated variety and grown during the current season by the exhibitor.**
- Entries in this class will be judged on yield per acre and on an exhibit consisting of ten (10) ears of corn selected from the plot used in getting a sample. This plot is charted below.
- Corn to be harvested consists of **three (3) rows each 15 feet long** and five rows apart. The dimensions of the rectangular plot will be 5 feet in length of row, and eleven (11) rows in width. **A total of 45 feet of row will be harvested.**

- The corn sample should be shucked and must be selected in accordance with the chart above. **Count the total number of plants harvested and record this number. Weigh the sample and record the weight.** Spring, digital, and platform scales are all acceptable devices for determining the sample weight. From this sample, **collect two (2) ten-ear sub-samples.**
- Bring these two 10-ear sub-samples to the Jacob Building. **Do not bring the entire harvested sample.**
- One 10-ear sub-sample will be used by the Fair to determine the moisture content of the grain at harvest and will then be removed from the building by the exhibitor.
- The other 10 ears will be the exhibit to be displayed with the yield results. **Exhibit must include the recorded sample weight, harvested plant count, row width, and brand/hybrid or variety name.**
- Uniform samples with a minimum of insect damage and rots are desired. Ears should be intact including unfilled tips. **(These 10 ears may also be entered in Class 2, Lot 1.)**

Sample Weight Verification

Name of Brand/Hybrid No.	Row Width	No. of Plants Harvested
No. of Plants per Acre*	Weight of Sample	

* Plants per acre = (11616/row width in inches) x Number of plants harvested from 45' of row.
 Example: (11616/36") x 60 plants = 19360 ppa

The UT Agricultural Experiment Station will determine the grain moisture and yield per acre based on dry shelled corn at 15.5 percent moisture content

I certify that the above information is correct and has been taken in accordance with the rules.

FFA Potato Show

Scoring

Entries in this class will be judged on the basis of 75 percent for production, and 25 percent for quality, and on an exhibit consisting of twelve (12) selected potatoes.

Yield Verification

Yields to be verified before or after harvest by authorized agent of the Fair Association, designated in cooperation with the Agricultural Extension Service and Department of Agricultural Education. Yield scores will be provided to Department Superintendent at time of entry.

Potato Yield Determination Before Harvest

All row-crop yields can be directly determined without computation by weighing the yield from a specified row length and moving decimal point left or right. In the case of potatoes in 3ft rows, the pounds produced on 24 ft. of row give acre yield in 60 pound bushels by moving the decimal point one space to the right.

Example: 26.5 pounds equals 265 bushels per acre.

Yield checking should be done after vines have died and before crabgrass takes over. Three to five samplings should be taken per acre, averaged together. Samplings should properly represent field variability. The less variable the vine growth, the fewer the yield samplings needed. Indicate weight of each sample.

Row length harvested is related to row spacing as follows:

32"=27'6", 36"=24'0", 38"=22'8", 42"=20'7"

Most useful equipment for field checking is a long-handled, six-tine fork, a basket, and a spring scale.
